^a Final numbers for FY 2008 reflect an across the board cut of 1.747% in all non-defense and non-homeland security spending.

^b Beginning in FY 2008, several education, health, welfare, and children’s programs within the Labor-HHS bill were framed as a “Reducing the Need for Abortions” Initiative. The inclusion of this language ties together programs which help prevent teen and unplanned pregnancy, encourage women to carry their pregnancies to term, and provide support for new parents who have economic difficulties. The framework is actually in the Joint Explanatory Statement Section rather than in the HHS component of the appropriations.

^c President Bush and the Congress were at an impasse and could not reach an agreement on 2009 funding levels, and the House and Senate chose not to pass any appropriations bills until a new President took office in January 2009. For this reason, all programs whose funding is annually appropriated through this process were operating under a continuing resolution at FY 2008 funding levels until the FY09omnibus appropriations bill was enacted in March 2009.

^d Within the welfare reform authorization included in the 2005 Deficit Reduction Act, \$50 million per fiscal year was authorized as mandatory abstinence education money for states, but Title V funds were only provided through June 30, 2007. In the final CR for the FY07 cycle, only 75% of the abstinence funds were appropriated because its authorization expired in the 3rd fiscal quarter. No mandatory funds are authorized for FY08. In the FY08 Presidential budget request, discretionary abstinence education funds were proposed under the Children and Family Services Programs to supplement both the FY07 and FY08 numbers so that each year the total amount would remain at \$50 million, but this budget request was not approved. Through the Medicare, Medicaid and SCHIP Extension Act of 2007 (P.L 110-173), funds have been extended through June 30, 2008.

^e This program is not subject to annual appropriations. As of 12/16/09, the Senate’s pending health reform bill, H.R. 3590 - the Patient Protection and Affordable Care Act, includes Sec. 2954 to restore \$50 million/year for the mandatory abstinence grants for FY10-FY14.

^f This program is not subject to annual appropriations. As of 12/16/09, the Senate’s pending health reform bill, H.R. 3590 - the Patient Protection and Affordable Care Act, includes Sec. 2953 which creates the Personal Responsibility Education program, which would provide \$75 million in mandatory funds each year for FY 2010 through FY 2014 for teen pregnancy prevention programs. If included in the final health reform package, each year, \$50 million in formula grants would be available to states for evidence-based teen pregnancy prevention programs. The remaining \$25 million would be available for states and communities to fund innovative approaches to teen pregnancy prevention (particularly for working with at-risk youth), grants to tribes, and for research, training and technical assistance.

^g The conference agreement does not provide funding requested by the President and approved by the House for the Adolescent Family Life program to carry out effective teenage pregnancy prevention programs.

^h Not subject to annual appropriations. Both the House (H.R. 3962) and Senate (H.R. 3590) health reform bills contain a provision that would establish a state option to expand Medicaid family planning services up to the state's eligibility level for pregnancy-related care.

ⁱ The conference agreement does not provide funding for the Strengthening Communities Fund. The American Recovery and Reinvestment Act (ARRA) provided \$50 million through September 30, 2010 for this purpose.

^j The conference agreement includes \$20 million to fund demonstration projects that aim to improve the outcomes for children and families, particularly those with long-term involvement in foster care. The demonstration program will take a multi-faceted approach to reduce the number of children who stay in foster care for extended periods of time and encourages an upfront investment in evidence-based or evidence-informed services.

^k The conference agreement does not fund the President's FY10 budget request for the expansion of the CDC's safe motherhood program, which promotes evidence-based interventions for teen pregnancy prevention.

^l Not subject to annual appropriations. The House health reform bill (H.R. 3962) includes language to provide a total of \$750 million in mandatory funding for the program between FY 2010 and FY 2014, and the Senate version (H.R. 3590) provides \$1.5 billion in mandatory funding for the program between FY 2010 and FY 2014.

^m YouthBuild also received \$50 million in the Recovery Act. See http://www.thenationalcampaign.org/policymakers/PDF/Recovery_Act_Summary_FINAL.pdf

ⁿ The conference agreement includes \$30 million for a new competitive grant program to provide transitional jobs activities instead of \$35 million as proposed by the House and \$40 million as proposed by the Senate. The conference agreement provides an additional \$15 million for these activities within the Reintegration of Ex-Offenders program, resulting in a total of \$45 million for transitional jobs activities.

^o WIA Youth Activities also received \$1.2 billion in Recovery Act. See http://www.thenationalcampaign.org/policymakers/PDF/Recovery_Act_Summary_FINAL.pdf

^p Of the \$108 million provided in the conference agreement, \$15 million is dedicated to transitional jobs activities as noted above in the Transitional Jobs program.

^q Not subject to annual appropriations. The House-passed version of the Student Aid and Fiscal Responsibility Act of 2009 includes a total of \$3 billion in mandatory funds over 5 years (\$600 million each year from FY 2010 to FY 2014) for this program. Senate action is pending.
